

The parts in this list came from a "Lionel Service Station" from the 1950's. The parts are all original Lionel parts, **not reproductions**. You will need a Lionel repair manual or some other document because you have to order by part number. Parts without a description or price will be priced when I inspect them for shipping. You should order based upon the part number but give a description of the part from the repair manual. All transactions should be via the email indicated hereon. Thank you and happy hunting.

If you wish to sell any trains I am always looking for Lionel and American Flyer trains to purchase.
